CAPABILITY STATEMENT

Reducing EEE component, radiation-test, and technical execution risk before it delays mission hardware.

1 HOW LANTRYX HELPS

Lantryx Systems LLC integrates EEE component engineering, radiation-test campaign leadership, and technical program controls to improve hardware readiness, decision visibility, and evidence closeout.

CALL LANTRYX WHEN: Qualification or evidence gaps, radiation-test readiness, supplier or facility coordination, or limited technical execution visibility threaten a major review or hardware milestone.

2 CORE COMPETENCIES

EEE Parts & Component Engineering

Identifies qualification, evidence, supplier, and lifecycle risks before they affect procurement, hardware readiness, or technical reviews.

Parts-list and requirements review • qualification and test-evidence assessment • evidence gap and risk analysis • supplier and lifecycle coordination • decision packages

Radiation Test Campaign Leadership & Coordination

Aligns requirements, facilities, suppliers, test hardware, logistics, schedules, discrepancies, and closeout evidence to improve campaign readiness and control.

Campaign planning and readiness • requirements-to-test traceability • facility, supplier, logistics, and schedule coordination • discrepancy and retest coordination • evidence closeout

Technical Program Execution & Control

Connects technical work, schedules, dependencies, risks, decisions, reviews, and closeout evidence to maintain execution visibility and control.

Work-package planning • integrated schedules and dependencies • risk, action, decision, assumption, and change control • interface and readiness review coordination • status and closeout

3 DIFFERENTIATORS

- One accountable technical lead from scope through closeout
- Integrated EEE, radiation-test, and program execution
- Controls tied to engineering dependencies and decisions
- Decision-ready assessments, traceability, and closeout records
- PMP®-credentialed, founder-led execution

4 REPRESENTATIVE DELIVERABLES

- EEE component-risk and qualification assessment
- Radiation-test campaign plan and readiness package
- Requirements-to-evidence traceability matrix
- Integrated technical schedule and execution register
- Technical review package and closeout decision record

5 FEDERAL CODE ALIGNMENT

Type	Code	Description / Role
NAICS	541330	Engineering Services — primary alignment
NAICS	541715	R&D in engineering/sciences — supporting
NAICS	541690	Scientific/technical consulting — supporting
NAICS	541611	Management consulting — scope-dependent
PSC	R425	Engineering/technical services — primary
PSC	R408	Program management/support — supporting

RELEVANT KEY PERSONNEL EXPERIENCE — PRIOR EMPLOYMENT

EEE COMPONENT & RADIATION SURVEILLANCE EXPERIENCE

- **16+ years** of aerospace, defense, and high-reliability engineering experience
- Radiation-effects analysis with radiation test campaign planning, execution, coordination and leadership.
- EEE component engineering across at least 7 defense program efforts

TECHNICAL LEADERSHIP & PROGRAM EXECUTION

- Qualification, surveillance, technical-evidence, and lifecycle-risk reviews
- Supplier, test-facility, budget, schedule, logistics, and readiness coordination
- Controlled procedures, decision records, risk/action tracking, traceability, and technical closeout

Prior-employment experience is presented as key-personnel qualifications and is not Lantryx Systems LLC corporate past performance.
