CAPABILITY STATEMENT

Helping aerospace and defense teams reduce technical execution risk and improve readiness.

1 CAPABILITY NARRATIVE

Lantryx Systems LLC helps aerospace, defense, space, and emerging-technology teams reduce technical execution risk through integrated EEE parts and component engineering, radiation test campaign leadership and coordination, and disciplined technical program execution and control. We improve readiness, decision visibility, coordination, and execution control across complex technical work.

2 CORE COMPETENCIES

EEE Parts & Component Engineering

Improves component decisions by identifying qualification, evidence, supplier, and lifecycle risks before they affect hardware readiness.

Parts-list and requirements review • qualification and test evidence review • risk and evidence-gap analysis • supplier and lifecycle-risk coordination • technical decision packages

Radiation Test Campaign Leadership & Coordination

Improves campaign readiness and execution by connecting requirements, schedules, facilities, suppliers, actions, evidence, and closeout.

Campaign planning and readiness • requirements-to-test traceability • facility, supplier, logistics, and schedule coordination • discrepancy and retest coordination • evidence closeout

Technical Program Execution & Control

Strengthens execution control by connecting technical work, schedules, dependencies, risks, decisions, reviews, and closeout evidence.

Technical work-package planning • integrated schedules and dependencies • risk, action, decision, assumption, and change control • interface and readiness-review coordination • technical status and closeout

3 DIFFERENTIATORS

- Founder-led accountability
- Specialized EEE and radiation-test campaign experience
- Engineering-to-program integration
- PMP®-credentialed execution discipline
- Evidence-centered, decision-ready technical artifacts

4 REPRESENTATIVE DELIVERABLES

- EEE component-risk and qualification assessment
- Radiation test campaign plan and readiness package
- Requirements-to-evidence traceability matrix
- Integrated schedule and execution-control register
- Technical review and closeout decision package

5 FEDERAL CODE ALIGNMENT

Type	Code	Description / Role
NAICS	541330	Engineering Services — primary alignment
NAICS	541715	R&D in engineering/sciences — supporting
NAICS	541690	Scientific/technical consulting — supporting
NAICS	541611	Management consulting — scope-dependent
PSC	R425	Engineering/technical services — primary
PSC	R408	Program management/support — supporting

RELEVANT FOUNDER EXPERIENCE

ENGINEERING AND TEST EXPERIENCE

- EEE qualification, surveillance, and technical evidence review
- Systems engineering, radiation-effects support, and verification
- Multi-year radiation test campaign planning leadership

TECHNICAL LEADERSHIP & PROGRAM EXECUTION

- Cross-functional, supplier, and test-facility coordination
- Controlled plans, procedures, and readiness packages
- Risk, action, traceability, and decision support

Founder professional experience was gained through prior employment and is not Lantryx Systems LLC corporate past performance.
